LED INFINITY MIRROR

LED Infinity Mirror Schematic diagram

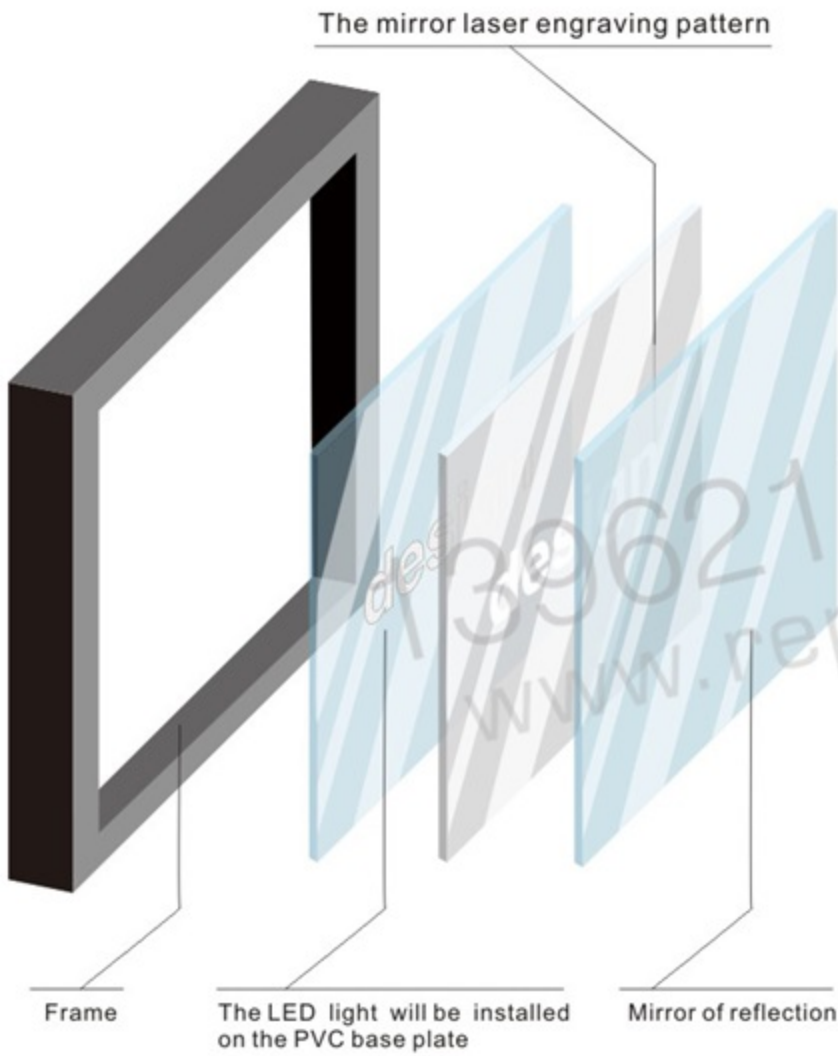

About the infinity Mirror

Infinitymirror is decorative device. It is composed of semi-transmission lens+intermediate layer+luminous object+reflective lens. The luminous object in the middle layer forms a multi-layer superimposed image through multiple reflections of the semi-transmission lens and the reflective lens.infinity mirror can present a deep visual effect in a limited space, and is often used to decorate the ground, wall and ceiling.

PS: The coating spacing between the semi-reflective lens and the reflective lens determines the spacing between the multilayer images. The transmittance of the semi-reflective lens, the reflectivity of the reflective lens, the reflectivity of the semi-reflective lens, and the brightness of the luminous object jointly determine the number of layers of the image.

CHART OF STRUCTURE

THE INFINITY MIRROR CUSTOMIZATION PROCESS

01

Dimension: 1100**1600mm
Customers's images or designs

02

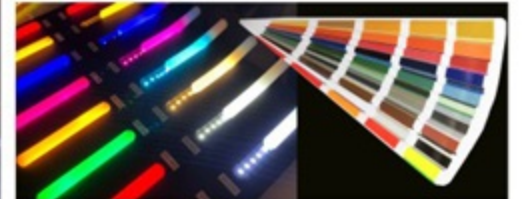

Confirm the classification of the infinity mirror with customers, and provide the effect drawing and quotation of the abyss mirror

03

Confirm order information
Color, shape, accessories,
installation kit, payment method,
factory production

SPECIFICATIONS

Product name	Infinity mirror
Dimension	Customize according to demand
Box material	Stainless steel/galvanized sheet
Product technology	Machining + handmade
Luminous color	Multiple colors can be chosen
Wattage	DC12V
Package	Wooden box

INSTALLATION METHOD

- ▶ The size can be customized, and the size can be met
- ▶ Hang on the wall, as decoration
- ▶ Spread on the floor, you can step on feet
